SUMMARY

Software Engineering graduate with a focus on full-stack web development (PHP, Laravel). Experienced in developing and maintaining dynamic web applications, with a technical portfolio encompassing corporate platforms, internal administrative tools, and comprehensive academic web projects. Seeking a Junior Software Engineer role to apply practical coding skills and deliver functional business solutions.

EDUCATION

Universiti Malaysia Pahang Al-Sultan Abdullah **October 2021 – January 2026**

Bachelor of Computer Science (Software Engineering) with Honours | CGPA – 3.58

- ❖ Dean's list: 5 Semesters
- ❖ Graduation November 2026

Universiti Teknologi Mara

June 2020 – June 2021

Foundation in Engineering | CGPA – 3.56

EXPERIENCE

myHSE Sdn Bhd | Kuantan, Pahang

Software Developer (Part-Time)

Feb 2026 – Present

- ❖ Architected the backend structure for an internal management system using Laravel to digitize 3 key administrative workflows (quotations, invoices, and purchase orders), initiating the transition from manual paperwork.

Software Developer (Intern)

Aug 2025 – Jan 2026

- ❖ Customized and deployed a responsive company landing page using HTML, CSS, and PHP to establish a centralized digital presence for the company's services.
- ❖ Developed data retrieval and display modules for the freelance HSE consultant web application to streamline information access for users.
- ❖ Collaborated on digital marketing initiatives by producing and editing multimedia content for safety awareness using CapCut.

TECHNICAL SKILLS

- ❖ **Programming Languages:** PHP, Java, Python, C, HTML/CSS, JavaScript
- ❖ **Frameworks & Libraries:** Laravel, Filament, Flutter, Tailwind CSS, Bootstrap
- ❖ **Database & API:** MySQL, Firebase, RESTful API Integration, JSON
- ❖ **Tools & Technologies:** Git, GitHub, Laravel Herd, Laragon, Android Studio, VS Code

ACADEMIC & PERSONAL PROJECTS

Infraq Management System for Rumah Penyayang Tun Abdul Razak (Final Year Project)

- ❖ Developed an end-to-end donation platform using Laravel and Filament, integrating ToyyibPay for secure transactions and Tailwind CSS for a responsive user interface.

MindEase – Mental Wellness Application (Group Project)

- ❖ Co-developed an Android application within a 3-person team using Android Studio, integrating SQLite for local data management
- ❖ Implemented a DialogFlow-powered automated chatbot to facilitate basic user interactions and mental health check-ins.

E-Munakahat – Pahang Marriage Portal (Group Project)

- ❖ Built a web-based registration portal collaboratively in a 5-person team, applying MVC architecture principles using core PHP, HTML, and CSS.
- ❖ Self-learned and applied MVC architecture for the project.

AWARDS AND PARTICIPATIONS

K-Youth Employability Program by GIFT 2026 (Participant)

March 2026 – Present

- ❖ Selected for a national-level career preparation program focused on enhancing professional soft skills, corporate communication, and technical readiness for the IT industry.

Hackathon X Petakom 2024 (Participant)

- ❖ Developed a Food Charity App prototype utilizing Flutter and Firebase database within a time-constrained hackathon environment.

AICD 2021 (Silver Award)

- ❖ Pitched an innovative conceptual solution for tire puncture management during a virtual innovation competition
